EDUCATION

University of the West of England Bristol

B.S. in Computer Science - Artificial Intelligence | Current Honours Mark: 75.39%

Aug. 2022 – Expected May 2026

- **Certifications:** IELTS 6.5 (Valid through May 2025)

PROFESSIONAL EXPERIENCE

Authentic Education Hub (AEH)

Hanoi, Vietnam

AI Engineer Intern

Dec. 2024 – Mar. 2025

- Assisted in the development and enhancement of proprietary AI tools using leading frameworks including PyTorch, TensorFlow, and Hugging Face Transformers.
- Configured and deployed the Vintern-1b-v3.5 LLM locally to perform selective text and image information extraction, augmenting the system's NLP capabilities.

Phenikaa X

Hanoi, Vietnam

Image Processing Intern

Jun. 2022 – Aug. 2022

- Assisted in image processing and data annotation workflows to optimize object recognition and detection models for autonomous vehicles.

PROJECTS

Apollo Hotel AI Concierge | Python, FastAPI, Redis, Docker, FAISS, SQLite

- Engineered a production-grade hospitality automation system integrating Retrieval-Augmented Generation (RAG) and Autonomous Tool-Calling for luxury hotels.
- Implemented an Autonomous Intent Capture system using high-precision LLM reasoning to process casual chat requests and instantly notify relevant staff bots.
- Developed a Bi-Directional CRM Sync with Google Sheets to act as a real-time digital command center, triggering instant push notifications to Telegram.
- Orchestrated three specialized internal staff bots (Front Desk, Kitchen Admin, Service/Maintenance) alongside a Guest Bot to manage specific hotel departments.

Food Network Modernization | Django, Tailwind CSS, JavaScript, LLM

- Led frontend development and UI/UX modernization for a multi-vendor culinary marketplace utilizing Django templates and Tailwind CSS.
- Integrated Large Language Model (LLM) functionalities into the platform to enrich the user experience and provide intelligent filtering capabilities.
- Designed interfaces for complex BPMN workflows including product browsing, Stripe checkout flows, and Admin Settlement dashboards.

Restaurant Chain Management System (HRMS) | Python, Flask, HTML/CSS/JS, MySQL, Docker, Nginx

- Built a full-stack web application to manage business operations for multiple restaurants concurrently, including online reservations, ordering, and revenue tracking.
- Utilized Docker and Nginx to containerize the application and configure a reverse proxy, ensuring stable and secure deployments.
- Designed a normalized MySQL database integrated with SQLAlchemy ORM for efficient data manipulation and employee state management.

LLM Vintern Chatbot API | FastAPI, SQLAlchemy, JWT, Uvicorn, SQLite

- Created a RESTful API backend for a chatbot powered by the Vintern-1B-v3.5 LLM, supporting both advanced text conversations and image analysis.
- Implemented JWT-based authentication mechanisms to secure API endpoints and manage user access permissions safely.

SKILLS

Programming: Python, SQL, HTML, CSS, JavaScript

Frameworks & Libraries: PyTorch, TensorFlow, Hugging Face Transformers, Flask, FastAPI, SQLAlchemy, SQLAlchemyModel

Tools & Technologies: Docker, Git, Nginx, Uvicorn, SQLite, MySQL, FAISS, Redis

Soft Skills: Time Management, Teamwork, Communication, Analytical Thinking, Problem Solving
